QURE.AI / INDIA LIFE SCIENCES

CRM Operating Poster

One evidence-backed system for deciding who matters, what to do next, and when to do it.

THE OPERATING LOOP

1. DASHBOARD

Find the priority signal
Review overdue work, Tier 1 coverage, lead scores, and stale research.

2. ACCOUNT

State the hypothesis
Record why Qure.ai is relevant, the best use case, tier, owner, and source.

3. CONTACT

Map buying influence
Capture only public, verified professional information. Score relevance and role.

4. OPPORTUNITY

Test the use case
Define clinical trials, RWE, biomarkers, diagnostics, or integration path.

5. ACTIVITY

Move it forward
Log the outcome, assign one owner, and set one dated next action.

1. HOW TO READ THE DASHBOARD

START HERE EVERY DAY

High-priority lead + no next action = fix now.

Zero account coverage = research before outreach.

Research older than 90 days = refresh source, title, and hypothesis.

TURN A CHART INTO AN ACTION

Example: if pharma dominates contact coverage but diagnostics has few mapped roles, create a sourcing task for the missing diagnostics and imaging decision-makers.

2. BUILD RECORDS THAT ARE SAFE TO USE

ACCOUNT

Tier + owner + India-market relevance + use-case hypothesis + source URL + research date.

CONTACT

Current public title + function + seniority + buying influence + source + verification date.

OPPORTUNITY

Use case + stage + stakeholder map + risk + next best action + expected action date.

QUALITY RULE

Never infer a work email, phone number, LinkedIn URL, or current role. If it cannot be verified from a public source, label it unverified and re-check it.

3. USE THE RIGHT STAKEHOLDER LENS

ECONOMIC BUYER

Can authorize budget or commercial commitment. Show a credible strategic and economic case.

CHAMPION + EVALUATOR

Champion mobilizes support; technical evaluator validates clinical, data, workflow, and integration feasibility.

PERSONALISATION EXAMPLE

A verified Medical Affairs leader may care about evidence generation and RWE. Pair that conversation with a technical evaluator before proposing a solution path.

WHEN YOU SEE THIS	DO THIS NEXT
No contact coverage	Create a research task; do not send generic outreach.
Lead score 4.5+	Draft a role-specific outreach concept and confirm buying influence.
Opportunity has no next action	Set a dated discovery, research, or relationship action immediately.

CADENCE: 10 min daily - 30 min weekly - 45 min monthly
